

9/13/16 – Smith Services, LLC.

Smith Services, a full-service e-commerce agency, was founded in December of 2015 with a mission to help companies optimize their online presence through websites, online stores and online marketing.

“Your first step into e-commerce,” is the slogan and that is what Smith Services aims to be: the premier spot for all of your business needs. They are aware of how these newer marketing tools have evolved through the consumer base and are prepared to lead your business on the right track.

Here is why they do it: “The internet connects the world more and more every day and we believe we can show how it has the power to provide additional value to businesses all over through increased exposure and affordable advertising.”

The CEO and Founder, Edmund Smith added, “Business is rapidly changing due to the adoption of the internet and if you are not visible online you are missing out on valuable customers.”

Their services include design and development, strategy and support, marketing and optimization as well as sourcing and consignment. Currently there is a virtual staff of 5, with plans to hire locally as the business grows.

Visit their website to learn more and check out their latest work:
